Ph. No. +91 8123700951

GitHub: <https://github.com/keerthanar09>

Address: Ramamurthy Nagar, Bangalore, Karnataka

Portfolio: <https://my-portfolio-zeta-two-52.vercel.app/>

Skills

- **Languages:** Java, Python, SQL, C, C++, HTML, CSS, JavaScript, Typescript.
- **Frameworks:** Django, React.js, Next.js, Flask, Bootstrap, Node.js, TensorFlow, PyTorch, Spring, Flutter, Angular.
- **Tools:** LangChain, PostgreSQL, MySQL, Git, Google APIs, Spreadsheets, PowerPoint, Tableau, SQLite, OpenCV, Gradio, Scikit-learn, Pandas, Numpy, Transformers, Supabase, Prisma, FIASS, GPT.
- **Platforms:** Google Cloud Platform, AWS, PyCharm, Jupyter Notebook, Visual Studio Code, Google Colab, Firebase Studio, Vercel, Render, Netlify, Salesforce, Figma.
- **Soft Skills:** Effective Communication, Problem Solving, Leadership, Time-Management, Team Work.

Education

Dr. Ambedkar Institute of Technology, Bangalore, India

Dec 2022 - Aug 2026

Bachelors in Computer Science and Engineering; CGPA: 8.55

Relevant Course-work: Cloud Computing, Software Engineering, Artificial Intelligence and Machine Learning, Applied Linear Algebra, Computer Graphics and Image Processing, Computer Networks, Operating Systems, Research Methodology, Analysis and Design of Algorithms, Data Structures and Algorithms, User Interface Design.

Jun 2020 - Aug 2022

CMR National PU College, Bangalore, India

PCMC; Percentage: 88%

Relevant Course-work: Object Oriented Programming Concepts, C++ Programming, HTML, CSS, Python, SQL, Computer systems.

Projects

Algorithm Visualizer Application

Nov 2024 - Present

- Built a scalable ReactJS + Django application and SVG for dynamic rendering.
- To visualize algorithms such as Bubble Sort, Merge Sort and Dijkstra's.
- Deployed on Vercel (frontend) and Render (backend). Collaborated with a team to optimize performance for complex visualizations.

Attendance Marking System Using Face Recognition

Nov 2024 – Jan 2025

- Built a system that marks a student's attendance using Face Recognition.
- Consists a transformer model that alerts the user to remove their mask if they are wearing one.
- Integrated real-time video capture in web UI and optimized Python OpenCV pipeline for low-latency processing.

Teacher's Assistant Application

Apr 2025 - Present

- Used Next.js, a JavaScript frontend framework along with Tailwind CSS to style the frontend.
- The backend implements a variety of technologies and APIs such as Gemini API and Google Forms API.
- Leverages PostgreSQL for efficient relational database queries and Prisma ORM for maintainable backend code.

Certificates

NPTEL: Cloud Computing Course Certificate

May 2025

Skills: GCP, Cloud Security, Cloud Storage, MapReduce, Virtualization, AWS, Data Centre Design, Microsoft Azure.

Google: Data Analytics Course Certificate

May 2024

Skills: Pivot Tables, Google BigQuery, R Programming Language, Relational Databases, Spreadsheets, Tableau, Data Visualization, SQL.

Google: Project IDX Workshop Certificate

Oct 2024

Skills: Project IDX (Now Firebase Studios) tools.

BRAINOVISION: Java Full Stack using ReactJS and AI Certificate

Jan 2025

Skills: JavaScript, Java, Swing, JDBC, Servlets, Collection and Frameworks, Spring Framework, Hibernate.

Additional Activities

Google Developer Groups: Solution Challenge Certificate of Achievement

Dec 2022

Hack2skill Agentic AI Day Volunteer

July 2025
